📍 Seeking a PFE Internship in AI Engineering or Full-Stack Development

SUMMARY

Third-year computer science engineering student specializing in AI, web, and mobile development. Proven experience in implementing AI solutions, developing full-stack applications, and creating mobile platforms. Passionate about leveraging machine learning and automation technologies to solve real-world problems and drive innovation.

EDUCATION

2023- 2026

National Engineering School of Sousse (ENISO) 3rd year
embedded computing engineering cycle

2021-2023

Nabeul Preparatory Institute for Engineering Studies (IPEIN)
Preparatory Engineering Exam - PT

2018 - 2021

Korba High School

Tunisian Baccalaureate - Technology Section

TECHNICAL SKILLS

Programming: Python, Java, C, C++, C#, Dart, Kotlin, JavaScript/TypeScript, HTML/CSS, SQL

AI/ML & Data: TensorFlow Lite, YOLOv8, NLP, Computer Vision, Model Training, Data Pipelines

Frameworks: Angular, Spring Boot, Flutter, Android SDK

Tools & Platforms: Git, Docker, n8n, Android Studio, VS Code, MySQL, UML, Microsoft Office

Soft Skills: Problem-Solving, Team Collaboration, Fast Learning, Communication (EN C1 / FR)

WORK EXPERIENCE

Seeds for the Future Bootcamp Trainee-Huawei

China, October 2025 -10 days

- Selected among **top 10 Tunisian engineering students** for a 10-day intensive training in **AI, Cloud, 5G, and IoT**.
- Trained by Huawei engineers and visited tech leaders including **Huawei, DJI, and Tencent**.
- Explored tech hubs in **Dongguan and Shenzhen**, with cultural visits to the Shenzhen Museum.

Tunis, June 2025–July 2025

Internship - Capgemini

- Developed a secure data management platform with import/export functionality for **XML, CSV, and JSON** files.
- Implemented **AES/RSA** encryption and file signature verification to prevent tampering and ensure data integrity.
- Designed the system using UML diagrams and built the backend with **Python, SQLAlchemy, and MySQL**.

Internship - Tunisie Telecom

Nabeul, June 2024–July 2024

- Field Support:** Assisted telecom technicians with **Wi-Fi** setup, phone line repairs, and **4G** infrastructure, gaining practical knowledge of residential internet delivery.
- Software Development:** Developed an **Angular**-based internal dashboard for managing Tunisie Telecom services, implementing the company's official **UI/UX** theme .

ACADEMIC PROJECTS

Restaurant SaaS Platform (Restauronio)

- Built multi-tenant restaurant OS using Next.js, Express.js, and Supabase PostgreSQL
- Implemented modular licensing, POS, KDS, reservations, and floor management
- Developed AI-powered customer agents via WhatsApp and web chat with Vision LLM
- Created AI-assisted theme generation and multi-language digital menus with RTL support
- Designed hourly usage-based billing system with per-tenant module gating

 <https://restauronio-frontend.onrender.com/>

HealthConnect

- Developed Android (**Kotlin**) patient platform with AI symptom analysis chatbot
- Integrated **Google Maps API** for doctor discovery and location-based healthcare services
- Implemented secure user authentication and real-time communication features
- Utilized natural language processing for symptom analysis and medical guidance
- Created user-friendly interface with intuitive navigation and data visualization

 <https://github.com/abdoukhemir/HealthConnect>

RoadObject-Recognition-for-Autonomous-Vehicles

- Implemented **YOLOv8** architecture for real-time object detection in autonomous vehicle systems
- Developed computer vision pipeline for identifying road hazards, traffic signs, and pedestrians
- Created dataset preparation and model training workflow for optimal performance
- Achieved high accuracy in various weather and lighting conditions

 <https://github.com/abdoukhemir/RoadObject-Recognition-for-Autonomous-Vehicles-using-YOLOv8>

E-commerce-Workflow

- Engineered comprehensive **n8n workflow** system for end-to-end e-commerce operations
- Designed automated order management service with inventory tracking
- Implemented abandoned cart recovery system with personalized notifications
- Created low stock alerts and automated restocking triggers
- Integrated **locally hosted LLM** model for intelligent business decision making

 <https://github.com/abdoukhemir/E-commerce-Workflows>

CERTIFICATES

- 2025- **C1 TOEIC** Certificate
- 2025- **Red Hat** Application Development I: Programming in Java EE 7.0
- 2025- **Huawei** Talent Development Flagship Project in CHINA
- 2025- Accelerating Data Engineering Pipelines from **NVIDIA**
- 2025- Code Generation and Optimization Using **IBM Granite**

LANGUAGES

- English – **Advanced** (C1 Toeic)
- French – **Advanced**
- Italian – **Basic**

VOLUNTEERING

- 2025: **EUREKA** – vice president
- 2024: **Soli and Green** - Active member
- 2013-2019 **TRIART conservatory** - Guitarist
