SUMMARY

Computer Science Engineer (Distributed Systems, ENISO 2026) who designs and ships LLM-powered agents that take real actions inside business systems, across voice, chat and document inputs, including fully on-premise setups. Combines a distributed-systems foundation with full-stack range to take ideas from backend to deployed product. Seeking an AI / Automation Engineer role.

TECHNICAL SKILLS

AI Agents: LLM tool use, MCP, voice & vision agents, local LLMs (Ollama, LM Studio)
Automation: n8n, Odoo ERP, REST APIs, WhatsApp
Languages: Python, TypeScript/JavaScript, Java, SQL
Stack: Next.js, Express.js, Angular, React Native, PostgreSQL, MySQL, Docker, Git

PROJECTS

Restauronio – Multi-tenant Restaurant SaaS · Next.js, Express.js, Supabase — restauronio-frontend.onrender.com

- Built a SaaS with 5 modules (POS, kitchen display, reservations, floor management, licensing) and hourly usage-based billing.
- Shipped AI agents on WhatsApp and web chat (Vision LLM), plus AI-generated themes and RTL multilingual menus.

Aria – AI Voice Receptionist — voice-ai-receptionist-nf7w.onrender.com

- Built a voice agent for clinics that answers questions and books appointments, with a live transcript of each call.

Receipto – AI Expense Tracker · React, Node.js, Vision AI — receipto-cihc.onrender.com

- Vision AI extracts line items, totals, tax and merchant from a photo of any receipt.
- Real-time spending analytics with category breakdowns and budget insights.

PotaLang – Language-Learning Android App · React Native (Expo) — potalang.netlify.app

- Launched an Android app covering 7 languages (A1–C2), with 86 voiced story episodes and a 42-lesson Arabic path.
- Offline-first: progress stays on the device, no account required.

EXPERIENCE

AI Engineering Intern (PFE) – Warzeez Solutions — Feb – Jun 2026

- Built a fully local AI agent (n8n, Ollama/LM Studio, MCP server) automating Odoo ERP workflows across HR, Sales, Purchases and Products. github.com/abdoukhemir/odoo-ai-agent
- Added voice, text and file input, with batch processing to execute multiple orders in one request.
- Kept all LLM inference on-premise, so no company data leaves the network.

Seeds for the Future – Huawei · China — Oct 2025

- Selected among the top 10 Tunisian engineering students for a 10-day program in AI, Cloud, 5G and IoT.

Software Intern – Capgemini · Tunis — Jun – Jul 2025

- Built a data platform for XML, CSV and JSON import/export (Python, SQLAlchemy, MySQL).
- Added AES/RSA encryption and signature checks to detect file tampering.

Software & Telecom Intern – Tunisie Telecom · Nabeul — Jun – Jul 2024

- Built an Angular dashboard for internal telecom services, following the company's UI/UX theme.
- Supported field technicians on Wi-Fi, phone-line and 4G installations and repairs.

EDUCATION

Engineering Degree, Computer Science (Distributed Systems) – ENISO, Sousse — 2023 – 2026

Preparatory Cycle for Engineering Studies – IPEIN, Nabeul — 2021 – 2023

CERTIFICATIONS

- **TOEIC** – C1 (2025)
- **NVIDIA** – Accelerating Data Engineering Pipelines (2025)
- **IBM** – Code Generation and Optimization Using IBM Granite (2025)
- **Red Hat** – Application Development I: Programming in Java EE (2025)

LANGUAGES

English – C1 (TOEIC) · **French** – Advanced · **Arabic** – Native · **Italian** – Basic

VOLUNTEERING

Vice President – EUREKA — 2025

Active Member – Soli and Green — 2024
